Prices +10%

All prices in the catalogue are plus 10%
Effective from 2nd December 2016

As many other suppliers, we too are experiencing effects of the currency and raw material fluctuations.

We have over the years as a business always tried to absorb any price increases we have from within our business or from our suppliers. Many of our products have had no price increase since 2011 and some ranges were recently reduced when the euro improved back in late 2014. This has left us without the ability to absorb the severity of the current situation. So regrettably from the 2nd December 2016, we need to increase our prices by 10%.

Please add 10% to the catalogue price.

Vertical Rack

A cost effective way of storing all those long and awkward items.

Our vertical racking is derived from our Heavy Duty Midspan system. The system comes as a starter and extension bay format meaning long runs are more cost effective.

The bays come with 3 dividers, all necessary frames and base plates, two front beams and one back beam and base rail. Other size racks available to order, please contact the sales office.

- ★ **Great value for money**
- ★ **Store all your long awkward items**
- ★ **Quickly gets your storage organized**
- ★ **Simple to build and reconfigure**
- ★ **Fully adjustable hoop dividers**
- ★ **Starter and extension bay system**
- ★ **Can be secured to the floor**
